

ARYAN SHARMA

AI/ML Engineering | AI Security | Full-Stack AI | Product Design

Jaipur, Rajasthan | aryan.sharma.sde@gmail.com | +91 6005205662 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Summary

Computer Science undergraduate building applied AI systems in AI security, computer vision, and full-stack products. Built **PromptShield**, an agentic AI security scanner with deterministic detection, context-aware analysis, benchmark corpora, and optional local semantic review. Seeking AI/ML engineering, AI security, or applied AI product internships.

Education

Bachelor of Technology in Computer Science & Engineering

Aug 2024 – Jul 2028

JECRC University, Jaipur, Rajasthan

Relevant Coursework: Data Structures, Software Engineering, User Interface Design, Blockchain Technology

Skills

AI/ML: Computer Vision, YOLOv8, OpenCV, Whisper, NLP, Prompt Engineering, LLM Evaluation, AI Security, PyTorch

Backend: Python, FastAPI, REST APIs, Pydantic, Pytest, YAML Rule Systems, Git/GitHub

Frontend/Product: Next.js, TypeScript, JavaScript, API Integration, Figma, UI/UX Prototyping

Blockchain: Solidity, Move, Smart Contracts

Tools: Power BI, Adobe InDesign, Benchmark Design

Work Experience

UI/UX Design Intern

Jul 2025 – Oct 2025

Unified Mentor Private Limited, Remote

- Created Figma workflows and high-fidelity wireframes for interactive client products.
- Designed end-to-end UI flows, translating ambiguous product requirements into implementation-ready screens.
- Collaborated with development teams on design feasibility, handoff quality, and UI component consistency.

Technical Projects

PromptShield — Agentic AI Security Scanner

Python, FastAPI, Next.js, Pytest, Ollama

Security scanner for prompt injection, tool misuse, semantic attacks, and agentic workflow risks

- Built an agentic AI security scanner detecting prompt injection, credential exfiltration, tool misuse, memory poisoning, HITL bypass, indirect injection, and cross-agent abuse.
- Designed a layered engine with deterministic rules, structured pre-checks, intent signals, evidence frames, context classification, suspicion scoring, and optional local semantic review.
- Implemented a FastAPI API with `/evaluate`, `/health`, and `/metrics`, plus a Next.js dashboard for real-time verdicts, latency, and explainable signal attribution.
- Created benchmark corpora and 400+ backend tests; Ollama `qwen2.5:7b` review recovered 19 deterministic false negatives on a fresh local 120-case hybrid validation set.

Streamline AI — AI-Powered Video Analysis Platform

FastAPI, YOLOv8, Whisper, NLP

Full-stack video intelligence pipeline for object detection, transcription, scene analysis, and sentiment

- Built a video intelligence pipeline integrating YOLOv8 object detection, Whisper speech transcription, transformer-based sentiment analysis, and scene-level analysis.
- Developed REST endpoints and a 7-file test suite covering object detection, transcription, sentiment, scene detection, dashboard validation, and end-to-end integration.

FruityFizz — Beverage Brand Product Design

Figma, Adobe InDesign, UI/UX Design

End-to-end brand and product interface design for a beverage product concept

- Led UI/UX design for a beverage brand landing/product experience, defining visual direction, layout structure, color system, and high-contrast brand identity.
- Created high-fidelity prototypes and responsive UI flows in Figma, translating product positioning into conversion-focused screens.

Certifications

Anthropic Academy: Claude API, Model Context Protocol, Claude Code, Agent Skills

Cisco: Introduction to Cybersecurity

Activities

AI Agent Hackathon — Unstoppable Certificate of Participation

Hela CrossRoads Roadshow — JECRC University
